

Markins Full Leather Hand Strap

Unthread the strap and insert the optional ring for a neck strap.

Start threading through the strap hole of camera.

Thread through the leather ring. Due to the nature of leather it will be tight to pass through.

Thread through the support leather. And, insert the other leather ring.

If you are using a Markins plate with hand strap holes, thread through the plate hole. Or, if your camera or battery grip has a strap hole, thread through the hole.

Thread through the leather ring and the support leather.

Loosely attach the plate, and adjust the strap to fit your hand. And, tighten the plate.

Attach a neck strap to the neck strap ring.
