

Markins Plate Installation (Flange Type)

1. Find the threaded hole.

2. Screw in the bolt all the way, otherwise the bolt won't slide along the path.

3. Slide the bolt to the other end.

4. Screw in but not tighten the bolt to the body while leaving one or two turns.

5. Slide the plate so that the flange is flush against the body. Tighten the bolt.

6. Make sure that there is no gap between the flange and the camera body.

7. The flange may face the left side, or...

8. The flange can face the other side depending on a body.
